

AI / Machine Learning Engineer – Job Description

Position Summary

We are looking for an AI Engineer to develop machine learning and generative AI solutions and integrate models into production applications.

Key Responsibilities

- Develop and evaluate machine learning and AI solutions.
- Build applications using large language models.
- Design retrieval-augmented generation pipelines.
- Work with embeddings and vector databases.
- Create effective prompts and evaluate LLM outputs.
- Integrate AI models with APIs and production applications.
- Collaborate with software engineers to deploy AI features.

Required Skills

- Python
- Machine Learning
- Deep Learning
- Generative AI
- LLMs
- Prompt Engineering
- RAG
- LangChain
- Embeddings
- Vector Databases
- REST APIs
- Git
- Docker

Education

Bachelor's or Master's degree in Computer Science, Artificial Intelligence, Data Science, or a related field.

Experience

0–2 years of relevant experience; internships and academic projects are considered.
